

Remarks

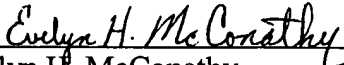

This divisional application claims priority to Provisional Application No. 60/331,316, filed November 14, 2001, and Utility Patent Application Serial No. 10/247,063, filed September 18, 2002, which are herein incorporated by reference in their entirety.

The specification has been amended as shown to comply with accepted U.S. patent practice. Applicant notes that the Office Action mailed 12/12/2003 relative to Application Serial No. 10/247,063 included a restriction requirement placing the claims into four identified inventions or groups. However the restriction requirement did not note a group for Claims 15 through 22. Per the March 1, 2003 discussion with the Examiner, the Examiner asserts Claims 15 through 22 fall within Invention II. Accordingly, the divisional application filed herein claims Invention II as defined by the Examiner in the Office Action for the parent application as being Claims 9-12, 15-22 and 26-30. Claims 1-8, 13-14 and 23-25 have been cancelled. No new matter has been presented.

It is respectfully submitted that all pending claims are in condition for allowance, and respectfully request that allowance be granted at the earliest date possible. Should the Examiner have any questions or comments regarding Applicant's amendments, the Examiner is asked to contact Applicant's undersigned representative at (215) 575-7034.

If there are any additional fees due in connection with this filing, please charge the fees to our Deposit Account No. 50-0979.

Respectfully submitted,

Evelyn H. McConathy
Registration No. 35,279
